

CITIZENS OF THIS DISTRICT!

THE BUSINESS MEN OF

CHAMPION, ALBERTA

Are sending out their S. O. S. for your co-operation this season. We believe that we can give you a service equal to any, with goods of exceptionally fine quality and reasonable in price.

We believe our thriving town of Champion is keeping step with the times, with the business and professional men alert to the present demands of the public, in the form of the best and latest creations of the many lines of merchandise representative in this business community.

New customers are making their appearance here every week, which augurs well for a splendid and steady increase in business for Champion.

Euler Refutes Munition Export Charges

Shows Canada's Exports Not Greatly Influenced By Munitions Demand

Canada's Minister of Trade and Commerce, Hon. W. D. Euler told the House of Commons on February 9th, that the proportion of Canada's exports going into munitions and armaments is small. He was speaking in reply to widespread statements that the increase in Canada's exports of trade was largely accounted for by trade in raw materials to be used for the manufacture of armaments and munitions.

HON. W. D. EULER

The Minister pointed out that between 1935 and 1937 Canada's export of animal products rose from \$97,000,000 to \$144,000,000. This important item in our trade expansion figures could hardly be attributed to the demand for armaments and munitions, the Minister said. Likewise, he pointed out that the increase in exports of wood and paper products from \$176,000,000 to \$263,000,000 did not enter into the question, although it was largely effected under Canadian export trade statistics. It might be said further that iron and steel products would be used for this purpose," the Minister said. "But as a matter of fact, our exports of iron and steel products consisted largely of farm implements, machinery and automobiles."

The Minister pointed out that 63% of the exchange which is allotted by the German Government under the recent Treaty for the purchase of Canadian goods must be in the form of wheat, asbestos, apples, seed, lumber, fish, wood pulp and other minor articles.

How Are Life Insurance Funds Invested?

Answer.—In government and municipal bonds and debentures, first mortgages and other securities.

Question.—What do these investments accomplish?

Answer.—They help to finance the undertakings of our Federal and Provincial Governments—our municipalities—our industries and public utilities. They also aid in building new homes and schools—and in improving farms.

Q.—What is the total amount of Life Insurance funds invested in Canada?

A.—More than Two Billion Dollars.

Q.—What does this sum represent?

A.—It represents the accumulated savings of more than 3,500,000 Canadian men and women.

Q.—How do I benefit from these investments?

A.—Through good roads, new schools and local improvements made by your own municipalities, which, in turn, create employment.

Q.—What is the guarantee back of these invested funds?

A.—The security of the individual loans, in addition to the integrity of the borrowers—whether governments, corporations, or individuals.

Q.—Have the Life Insurance companies of Canada kept faith with their policyholders?

A.—Yes. In good times and bad, they have fulfilled every guarantee 100 cents on the dollar.

This is the fourth of a series of messages sponsored by Life Insurance Companies operating in Canada. The fifth, to appear in two weeks' time, will discuss Life Insurance investments in Alberta.

SEED SELECTION AND PROTECTION

The thrill of spring is in the air and the farmers who plan to grow crops which bring both profit and enjoyment are now giving heed to the quality of the seed.

One of the important factors is the choice of variety suitable from the standpoint of climate, soil and markets. There are usually many varieties bearing local names such as mortgage litter and the granary filler; yet if one desires a guarantee of genuineness, the choice must be limited to approved strains of registered varieties.

Registration of varieties, says G. R. Snyder, has as its basis the improvement of the quality of Canadian crops through the use of superior seed. Registered seed is truly real to the variety named and well suited to the specific growing district or district. Purity is maintained by the frequent induction of elite stock. This stock, produced at experimental farms under expert supervision, is 100 percent true to type. For the purpose of increasing supplies, elite stock is distributed to careful seed growers who have the necessary facilities for conducting this exacting work.

The first crop produced by the farmer from the elite seed is known as "first generation" registered seed; it in turn produces "second generation", etc. Naturally, the supply of first generation seed is very limited, and the chief commercial source of seed really true to type starts with the second generation crop. Experimental station officials or agricultural representatives will help the grower in the choice of varieties.

The necessity for a liberal use of the fanning mill has long been recognized by most farmers, though many still neglect the equally important chore of treating the seed for control of those seed-borne diseases which definitely impair the quality of the crop. Covered smuts of barley and wheat, the smuts of oats and numerous root rots can now be controlled inexpensively by the use of an ethyl mercury phosphate dust, and the treating can be carried out before the rush of spring work begins.

While laying the foundation for better crop consideration might well be given to reducing one of the risks that beset a growing crop. First, there is the danger of the crop lodging; this may be due to a number of causes, but prominent among them is the low level of mineral

WE OWE YOU MONEY

Payable in CASH—ON DEMAND

If yours is one of the 4,740,000 accounts in which people have dollars on deposit in Canada's chartered banks, your bank owes you money.

That money does not belong to The People, the government, the nation, or to your neighbour. It is YOURS.

If you are a savings depositor, the bank, in addition to providing safety, pays you interest on YOUR MONEY just as a borrower pays interest to the bank, for it.

WHAT IS A BANK?—It is an institution organized to receive deposits and to make loans; that is the mechanical description. But it is a much more human place than that; it means much more to YOU.

Your bank is a place where you can deposit money for yourself and your family, and every customer that you can get it back whenever you call for it—in full and with interest.

The bank's books show your deposit as a sum of money it owes to you—may pay it when you ask for it—a liability of the bank.

Your bank is, too, a place where you can buy property or credit may borrow for you or other legitimate purposes.

The borrower, however, is not worthy. By worthy, we mean that he can be trusted to keep his word and integrity, his business ability, and the things he owns, his property, on which reasonable certainty can be placed and able to repay. We MUST know that he is a "good risk," for we LEST we are compelled to call on the other depositors for our money.

As a depositor, you are our creditor; we have to be prepared to pay you back. Therefore, we must be satisfied to collect in full our money, as well as our costs of operation.

We pay interest for deposits and charge interest on loans. You will realize that when we tell you the name of the bank, the smallness of our margin of profit.

Bank deposits are the money of certain people—not "The People". There is the substance of Canadian banking as plain as a piper's pipe. The bank knows that a long time ago you let others know just whose money it is and speaks of, when they are in a bind, the right to claim to bank deposits.

More than 4,700,000 people in Canada—equal to more than 42 percent of Canada's population—have their savings deposited with Canada's chartered banks. Of these no fewer than 4,084,000 are savings

depositors receiving interest on their money.

Canada's chartered banks have paid over \$97,000,000 in interest on deposits in the last ten years.

Savings of the Canadian people, deposited in the chartered banks, now total nearly \$1,384,000,000—the average savings deposit being \$679,000 in Canada's chartered banks.

It takes the equivalent of nearly three million savings accounts to make one loan of \$1,000.

And it takes the net profits, over and above the costs of doing business, on scores of loans of \$1,000 to make one loan of \$1,000. The loss of one single loan of \$1,000.

This shows what care the banks must take in lending, if the depositor's funds are to be safe. The average savings deposits of banks are less than one-half of one per cent. on their total assets.

Without deposits a bank could not long continue in business. YOUR MONEY remains on deposit in the bank. ONLY AT YOUR CALL and if you think the bank is lending recklessly, you will draw it out.

The bank must always keep itself in a position to pay you your deposit, in full, in cash, whenever you choose to call for it.

Canada's chartered banks realize that the establishing of your home, the happiness of your family, the education of your sons and daughters, their start in life, their progress in business, their pleasure for a rainy day, your peace of mind in the twilight of life, may depend largely upon this money—money that you have存 in a bank—money YOUR BANK OWES TO YOU.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

2

als in the soil. Rust is another cause of much loss, and for this there is no positive means of prevention except the development of resistant strains or varieties. Both these risks can be reduced, however, by the liberal application at seeding of a high phosphate fertilizer containing some potash. The mineral-supplied thereby tend to strengthen the straw, increase disease resistance and bring the crop to maturity before the yield is perceptibly diminished.

The thought has often been voiced that a field of waving wheat is one of the most wonderful sights in a landscape. This is scarcely true of any other crop of uniform stand and maturity, such as can be produced from pure seed that is true to type and free of disease. Crops produced from such seed bring greater commercial returns and add to the grower's pride in the produce of his fields.

While laying the foundation for better crop consideration might well be given to reducing one of the risks that beset a growing crop. First, there is the danger of the crop lodging; this may be due to a number of causes, but prominent among them is the low level of mineral

2 MARKETING BY GRADE

Marking by grade, as measured by the increasing value of ham held over several years, is becoming popular in Canada, proving conclusively that the assertion "Grading takes the heart out of beef" is true, particularly the case of beef.

Possibly there is not another article of food in which high quality is more important, or in which the quality is more easily measured, than the ham.

Savings of the Canadian people, deposited in the chartered banks, now total nearly \$1,384,000,000—the average savings deposit being \$679,000 in Canada's chartered banks.

It takes the equivalent of nearly three million savings accounts to make one loan of \$1,000.

And it takes the net profits, over and above the costs of doing business, on scores of loans of \$1,000 to make one loan of \$1,000. The loss of one single loan of \$1,000.

This shows what care the banks must take in lending, if the depositor's funds are to be safe. The average savings deposits of banks are less than one-half of one per cent. on their total assets.

Without deposits a bank could not long continue in business. YOUR MONEY remains on deposit in the bank. ONLY AT YOUR CALL and if you think the bank is lending recklessly, you will draw it out.

The bank must always keep itself in a position to pay you your deposit, in full, in cash, whenever you choose to call for it.

Canada's chartered banks realize that the establishing of your home, the happiness of your family, the education of your sons and daughters, their start in life, their progress in business, their pleasure for a rainy day, your peace of mind in the twilight of life, may depend largely upon this money—money YOUR BANK OWES TO YOU.

ROAST BEEF

Wipe off with a damp cloth. Rub well with salt and sprinkle with pepper. Place the fat side up in an open roasting pan. If roast is very lean, place an additional layer of suet on the lean side. Roast at 400 degrees F. and 15-20 minutes per pound, according to how well done the roast is desired. If a roast thermometer is used—and it is very desirable—it should read 180 degrees F. for rare roast; 155 degrees F. for a medium roast, and 170 degrees F. for a well-done roast. Serve with a horseradish sauce or Indian chutney.

SIRLOIN STEAK BROILED

Wipe steak with cloth wrung from cold water. Trim off superfluous fat. Grease a griddle, a broiler or a barbecue, and heat over strong heat, searing first on one side, and then the other. When both surfaces have been seared, reduce heat and continue broiling, turning the meat frequently. When the meat is well done, remove from the heat, let stand a few minutes, then slice with a sharp knife.

PILLET MIGON, Maitre d'Hôtel butter
Cut beef in tenderloin in slices 1/4 inches thick, trim in circular shape, and surround with a thin slice of bacon. Wrap with a piece of broiling skewer and broil 6 minutes. In a small greased frying pan, brown the butter. Remove to hot serving platter and spread generously with Maitre d'Hôtel butter. Surround with broiled maitre d'hôtel.

It is impossible at the present moment to estimate with any degree of accuracy the heavy crop for 1938. The Agricultural Situation and Outlook, however, with the number of live cattle reported, the capacity for production has increased over previous years. It is quite possible, however, that there will be winter losses may affect this increase. Furthermore, reports indicate a possible shortage or major molar, securing plants in 1938 due to the heavy winter-killing of 1937-37, and a shortage of clover seed.

WHAT HO!

By RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto

CHAPTER VIII. — Continued

He sealed Lester's Wall, not soaring over the ground, and made his way to the fox burrow. He expected to find the fox going about its domestic duties innocent of the conspiracy afoot to deprive it of its brush and its future. He saw no fox, but he saw the tracks of its enemies to its subterranean abode. Ten yards from it he stopped short. At his feet the green grass was stained with red blood. Now he knew the fate of the foxes of a remark Captain Duff-Hoppe had made at dinner the night before.

"We should have jolly good sport," the captain had said. "Farmers report numerous foxes in the neighborhood. This morning Lord Felton's party found a fox cub shot dead. Foxes nearly got to earth but finally made the kill in Kingsley's Copse."

This then must be Kingsley's Copse, and that arrival smote the life-blood of the foxing fox; mangled in its own front-yard, just two frantic leaps from sanctuary.

Ernest gave out a sound half-hall, half-cough.

"Too late," he said.

He bent down to examine the remains of the fox. He smelled a foxy smell. "For some reason, at that moment, he felt an impulse to run back to the castle and tell Duff-Hoppe his buck teeth with a heartful of fox."

As he was about to turn away from the hole, he heard a sound which started off as a dead bark and ended in a frightened whimper. Tracing the sound, the shadower of the burrow, he touched his gun. He drew out a feebly squirming cub. The little critter made it plain that after waiting all night for the return of its mother, it was very hungry. Ernest scooped the cub up in his coat to keep it warm. He was in no danger of sharing the fate of the legendary Spartan boy, for the orphan was so young it could not bite.

Ernest conveyed his captive back to the castle and snuggled it up to his tower room. He made no mention of it to any one for he had a feeling that they might consider he was well on the way to the enemy in this one-sided war.

Hanging bedded the cub down on his overcoat in a closet, he tugged the bell-rope and summoned Sloat.

"Get me a jug of warm milk at once, please," Ernest said.

"Very good," Ernest said.

"And see that a jug of milk is brought here every morning and evening."

"Yes, sir."

"I intend to take milk baths," said Ernest. "I hear they are good for the complexion."

Sloat copied the news of this latest vagary of the mad American.

His soft-soled return found Ernest in the closet soothing the cub by stroking it. Ernest popped out of

COULDN'T EAT COULDN'T SLEEP

Now Free of Bad Liver and Kidney Troubles and Feeling Fine

Montreal, writes: "A mother once who felt terrible until she found how to get rid of her trouble, now has a healthy, normal, and secure new health. Mrs. A. H. Christie's Ritz Biscuits have given me cramps. I tried fruit-slices and my health greatly improved." Those famous little wafers have a special power to help the liver, kidneys, intestines. Troubles no. Health must improve. \$2c. and 50c. All delicious.

the closet and slammed shut the door.

"Shucks, Sloat," he said, taking the bag.

A plaintive whine came from the closet.

"What's that, sir?" asked Sloat.

"It's me, sir."

"I heard no sound."

Once again the cub voiced its need for nourishment.

"There it is again, sir," said Sloat. "It sounds like the cry of a very young fox."

"It is," said Ernest.

Sloat tried hard to remember that a well-trained servant does not show his emotions, especially the most unusual, when in the presence of a master.

"What's that, sir?" asked Sloat.

"That's me, sir."

"I heard no sound."

Once again the cub voiced its need for nourishment.

"There it is again, sir," said Sloat.

"It sounds like the cry of a very young fox."

"It is," said Ernest.

"It sounds like the cry of a very young fox."

"It is," said Ernest.

stiff shirt his mate relayed to him the tid-bits about Ernest.

"Fells belongs in a loony-bin," said the duke. "Old Bingo was good about the place, but the chit says he's not bad, but really scandalously rich. Why, the fellas stumped up a thousand of the best for a month's rent of this old hut without breaking an eye."

"Duke," said he, "I own the Mississippi River."

"Girl always exaggerates," said the duke. "Doubt if he owns more than half of it."

"Duke," he transported himself and mustache to the Great Hall, had three quick neck handshakes, and passed on his version of the Ernest saga to a fellow guest, Major General Sir Frederick Cowley, K.C.B., known in the service as "Mucky." Cowley bore because of his name and uncanny resemblance to that useful animal.

"Fells has a closetful of squabbling babies, shucks foxes, and thinks he somebody in 'Ivanhoe'; but he over the Mississippi River."

"Fancy," said the major general.

"Think I'll broach the subject of a sight loan," said the duke, "say five thousand dollars."

"Sight," said Ernest. "I heard no sound."

"Once again the cub voiced its need for nourishment.

"There it is again, sir," said Sloat.

Sloat tried hard to remember that a well-trained servant does not show his emotions, especially the most unusual, when in the presence of a master.

"What's that, sir?" asked Sloat.

"That's me, sir."

"I heard no sound."

Once again the cub voiced its need for nourishment.

"There it is again, sir," quavered Sloat.

"It sounds like the cry of a very young fox."

"It is," said Ernest.

OIL PRICES ADVANCE
LESS THAN IN OTHER
INDUSTRIES

The oil business has advanced prices wholesale and retail less than any other industry during the period of advancing prices. There is no reason based on either costs or consumer demand for oil prices to be reduced at this time.

It may be that various businesses are showing a recession, the extent of which at the moment is not easy to determine. But the oil business has had no decline in demand in contrast to that in other industries. As to its future, an estimate of requirements for December indicates a demand for 300,000 barrels of crude more than during the exceptionally heavy demand in December last year. This is a gain of 10 percent.

The surprising increase in consumption during the past three years which has been witnessed has demonstrated how essential the people have found motorization in their daily life. Even in the depth of depression they cling to their cars as an aid rather than a luxury.

With prices which have not been inflated, with an inventory situation which can be corrected, and with the large amount of oil which is in production on record, the oil industry is in an exceptionally favorable position. It has led in the emergence from the depression and it should keep on leading. Art. B-39.

It is impossible at the present moment to estimate with any degree of accuracy the honey crop for 1938, states The Agricultural Situation and Outlook, but, with an increase in the number of bee colonies reported, the capacity for production has increased over the past year. This is the only possible, however, that winter losses may offset this increase. Furthermore, reports indicate a possible shortage or major nuclear securing plants in 1938 due to the heavy winter-killing of 1936-37, and a shortage of clover seed.

DENTAL SURGEON
In Champion Friday only

CARMANGAY

W. Honeyman was organist at the Anglican church service on Sunday.

W. C. Burke has bought the old Central building, opposite Minty's Garage, and is moving it to his farm east of town.

A jolly little dance was held at Burwash last Friday, sponsored by the Social Credit club. The school was packed.

Miss Grace Church, of Tain, visited her parents, Mr. and Mrs. Roy Church, over the weekend.

The North Priscilla Club had a splendid meeting at the home of Mrs. Sid Thompson last Wednesday. Mrs. Lars Brandvold will entertain the Club at her home next Wednesday.

Mr. and Mrs. James McNaughton entertained at a delightful party on Friday evening, there being 15 x tables of bridge at play. Honors were awarded to Mr. and Mrs. L. A. Stark and Mr. and Mrs. O. L. Taylor.

The meeting of the Wheat Pool, held at the Hall last Wednesday, drew a splendid attendance. Derry Russell addressed the meeting, assisted by Johnny Hubka, the manager of the local elevator.

Mr. and Mrs. Glen Peacock of Calgary, passed through town Tuesday, on their way home after a delightful two month vacation spent in Bermuda, New York, Toronto and other eastern points.

Mr. and Mrs. Charlie Collier of Vancouver, formerly of Calgary, arrived on Monday to visit their daughter and son-in-law, Mr. and Mrs. Clarence White, and Mr. Collier's aged mother who resides with his brother and sister-in-law. Mr. and Mrs. Sid Collier, Mr. and Mrs. Collier look in the best of health. They will remain for a three week's visit.

On Sunday evening, Rev. A. V. Lytle gave a very interesting, instructive lecture in the United Church. His subject was "Barnard and the Work of the Tabernacle Society there." There was a splendid congregation. Rev. Lytle's annual visits are always appreciated.

On Monday evening the Ladies' Aid sponsored a program in the United church consisting of songs, recitations and play by the children after which Arnold Hermans gave a very interesting talk, with lantern slides, on inflation of money in Germany after the war. A large congregation enjoyed a pleasant and profitable evening.

Next Sunday evening at 7.30 the senior C. G. I. T. group will take charge of the service in the United church and will put on a short play, "Songs of Seven."

HARMONY COUNCIL
HAVE BUSY SESSION

A meeting of the Council was held in the Municipal Office on March 14th. J. W. Cain took the chair and immediately called for nominations for Reeve for the year 1938. Councillor Matlock nominated E. H. Griffin which was seconded by Councillor Hagerman. As there were no further nominations, Councillor Hopkins moved nominations close and Returning Officer J. W. Cain declared E. H. Griffin elected Reeve.

Reeve Griffin, in a few well chosen remarks wished to thank his Council for their confidence in him, in choosing him to lead them for another term and expressed the hope that all would work together as in previous years, for the interests of the ratepayers and the Municipality as a whole.

Minutes of previous meeting were read and a d approved, on motion of Councillor Ellis. The monthly report of the Secretary was examined and on motion of Councillor Hagerman, a d Ellis signed the oath of office, as councillors elected in 1938.

Reeve Griffin called for nominations for Deputy Reeve for the ensuing six months. It was moved by Hopkins that W. J. Ellis be appointed which carried unanimously.

Moved by Ellis that E. D. Batruff be appointed Auditor for 1938, a salary of \$100.00, and that he be asked to make an audit as in previous years. Carried.

A communication was read from the Village of Champion regarding improvements to the cemetery, the Village being prepared to contribute \$25.00 in conjunction with the Village.

Regarding letter from Manufacturers Life Co. re parcel of land acquired by municipality, after a short discussion, it was moved by Matlock that Secretary notify this company that Council is prepared to turn this land over to them, providing all arrears of taxes are paid and Company assume all expense in connection with transfer of title. Carried.

Secretary read a communication from A. I. Somerville, after discussion Mix asked permission of council to have a copy of this letter to act as he sees fit. Secretary promised to type copy of same and forward to Councillor Mix.

Communication from Vulcan hospital in respect to patient was discussed, these notifications are not in accordance with the Act, secretary was instructed to communicate with superintendent, and voice our objections, and demand that in future, such notifications must bear the attending physician's diagnosis, this was in form of motion by Councillor Ellis.

Communication was read from H. T. Lillie in respect to the standing of his land. Secretary was advised to inform Mr. Lillie, that this property will be off-rent for sale this fall.

Communication was read from the Canadian Institute

for the Blind, this was discussed and secretary was instructed to advise, that at present this district is not in a position to take on additional grants seeing that legislation is in progress both Provincial and Federal Legislatures.

Discussion arose in respect to the Municipality District purchasing a supply of strichnine for destruction of gophers, Mix moved that the council procure 200 ounces, same to be sold for cash at cost to rate payers, same to be handled through the United Grain Growers.

Secretary was instructed to advise the Woods Home that they are making efforts to secure a home for Joe Doyle, and will report at a later date. The council discussed the 1938 annual and requisitions for rural schools, Ellis moved that the following mill rates be applied: Auburn, 3 mills; Bow Valley, 7 mills; Bowron, 4 mills; Garrison, 16 mills; Fireguard, 3 mills; Harmony, 4 mills; Hiawatha, 3 mills; Long Coule, 3 mills; Marshall, 5 mills; Reid Hill, 4 miles; Prospect Slope, 7 miles; Sanderson, 8 miles; Tighi Hill, 4 miles; Washington, 5 miles; Yale, 5 miles; Valean, Municipal Hospital, 21 miles. Carried.

Matlock moved that necessary By-Law be prepared, and that Reeve and Secretary negotiate with the Canadian Bank of Commerce for a loan for school purposes for the year 1938 in the amount of \$8,531.00.

Moved by Hagerman that By-Law be approved and that Reeve and Secretary be authorized to borrow from Canadian Bank of Commerce the sum of \$7,000.00 for general purposes.

Ellis moved that By-Law be adopted and that Reeve and Secretary negotiate with the Canadian Bank of Commerce for a loan in the amount of \$1,568.50 for hospital requisitions for 1938.

Hopkins moved that Seed Grain By-Law No. 20 be approved and forwarded to the Minister of Municipal Affairs for approval, and council apply for a loan in the amount of \$6,000.00 for purchase and distribution of seed grain for the year 1938.

Reeve Griffin suggested all members of council act as a committee in the event of a Seed Grain Advances program.

Ellis moved that meetings be held the first Thursday of each month, at the hour of 2 o'clock sharp, as in 1937.

Before entering on the task of estimates for 1938, Reeve Griffin moved that Secretary's salary be \$1,000.00 and that he provide what assistance he needs.

Matlock moved that all members, etc. in respect to Public Works be same as in 1937.

The Council next made a detailed study of the estimates for 1938, these were examined in all details and were left in abeyance for another month, as it was thought that the present legislation may have some effect on same, after which it could be adjusted, and a mill rate struck at the next meeting.

EXECUTIVE MEET

An executive meeting of the Pioneer Club was held on Saturday afternoon with nine members present. E. Griffin, president of the club, presided and minutes of the meeting held July 3rd, 1937, were read and approved.

O Hagg and N. Carlson were appointed to interview the Hall Board re rent, with authority to pay.

A flower committee, consisting of L. Fath, M. Smith and H. Ferguson, was appointed.

The secretary was instructed to send a letter of condolence to the family of the late G. McKay.

It was decided that the Club sponsor a dance in the near future, with H. Ferguson, O. Hagg and N. Carlson as the committee in charge of arrangements.

The Therriault Coal Mine under the management of Geo. Rhodes has recently added to his mining equipment a coal cutter, which enables the mine staff to speed up with the output of coal.

The mine had a good run this season with quite an increase over last year's production, and considerable business in sight for the balance of this season's operations.

The mine staff was increased this season over the number employed last year and with the added assistance of the better mining equipment, the mine in future will be able to produce more coal, cleaner and in larger lumps which seem to be so popular with the public.

● ARE YOUR children
fussy about food? Have they
likes and dislikes?

Give them Dried or Pickled Cana-

dian Fish, fixed up in one of the easy

dishes that can be made with this food.

You can get such Dried Fish as Cod, Haddock,

Hake, Cusk and Pollock, and such Pickled Fish

as Herring and Anchovies. And we'll tell you

how far you live from open water. It comes to

you in perfect condition, every bit of it flavour

retained for your enjoyment.

It's grand for the family health... fish contains the proteins and minerals that help build

strong bodies... and it's economical, too.

Serve fish more often... for the health and

nourishment of the family.
